

All-in-One

Cynet provides a natively unified platform for detection, prevention, correlation, investigation and response across endpoints, mobile devices, users, networks, SaaS and cloud applications.

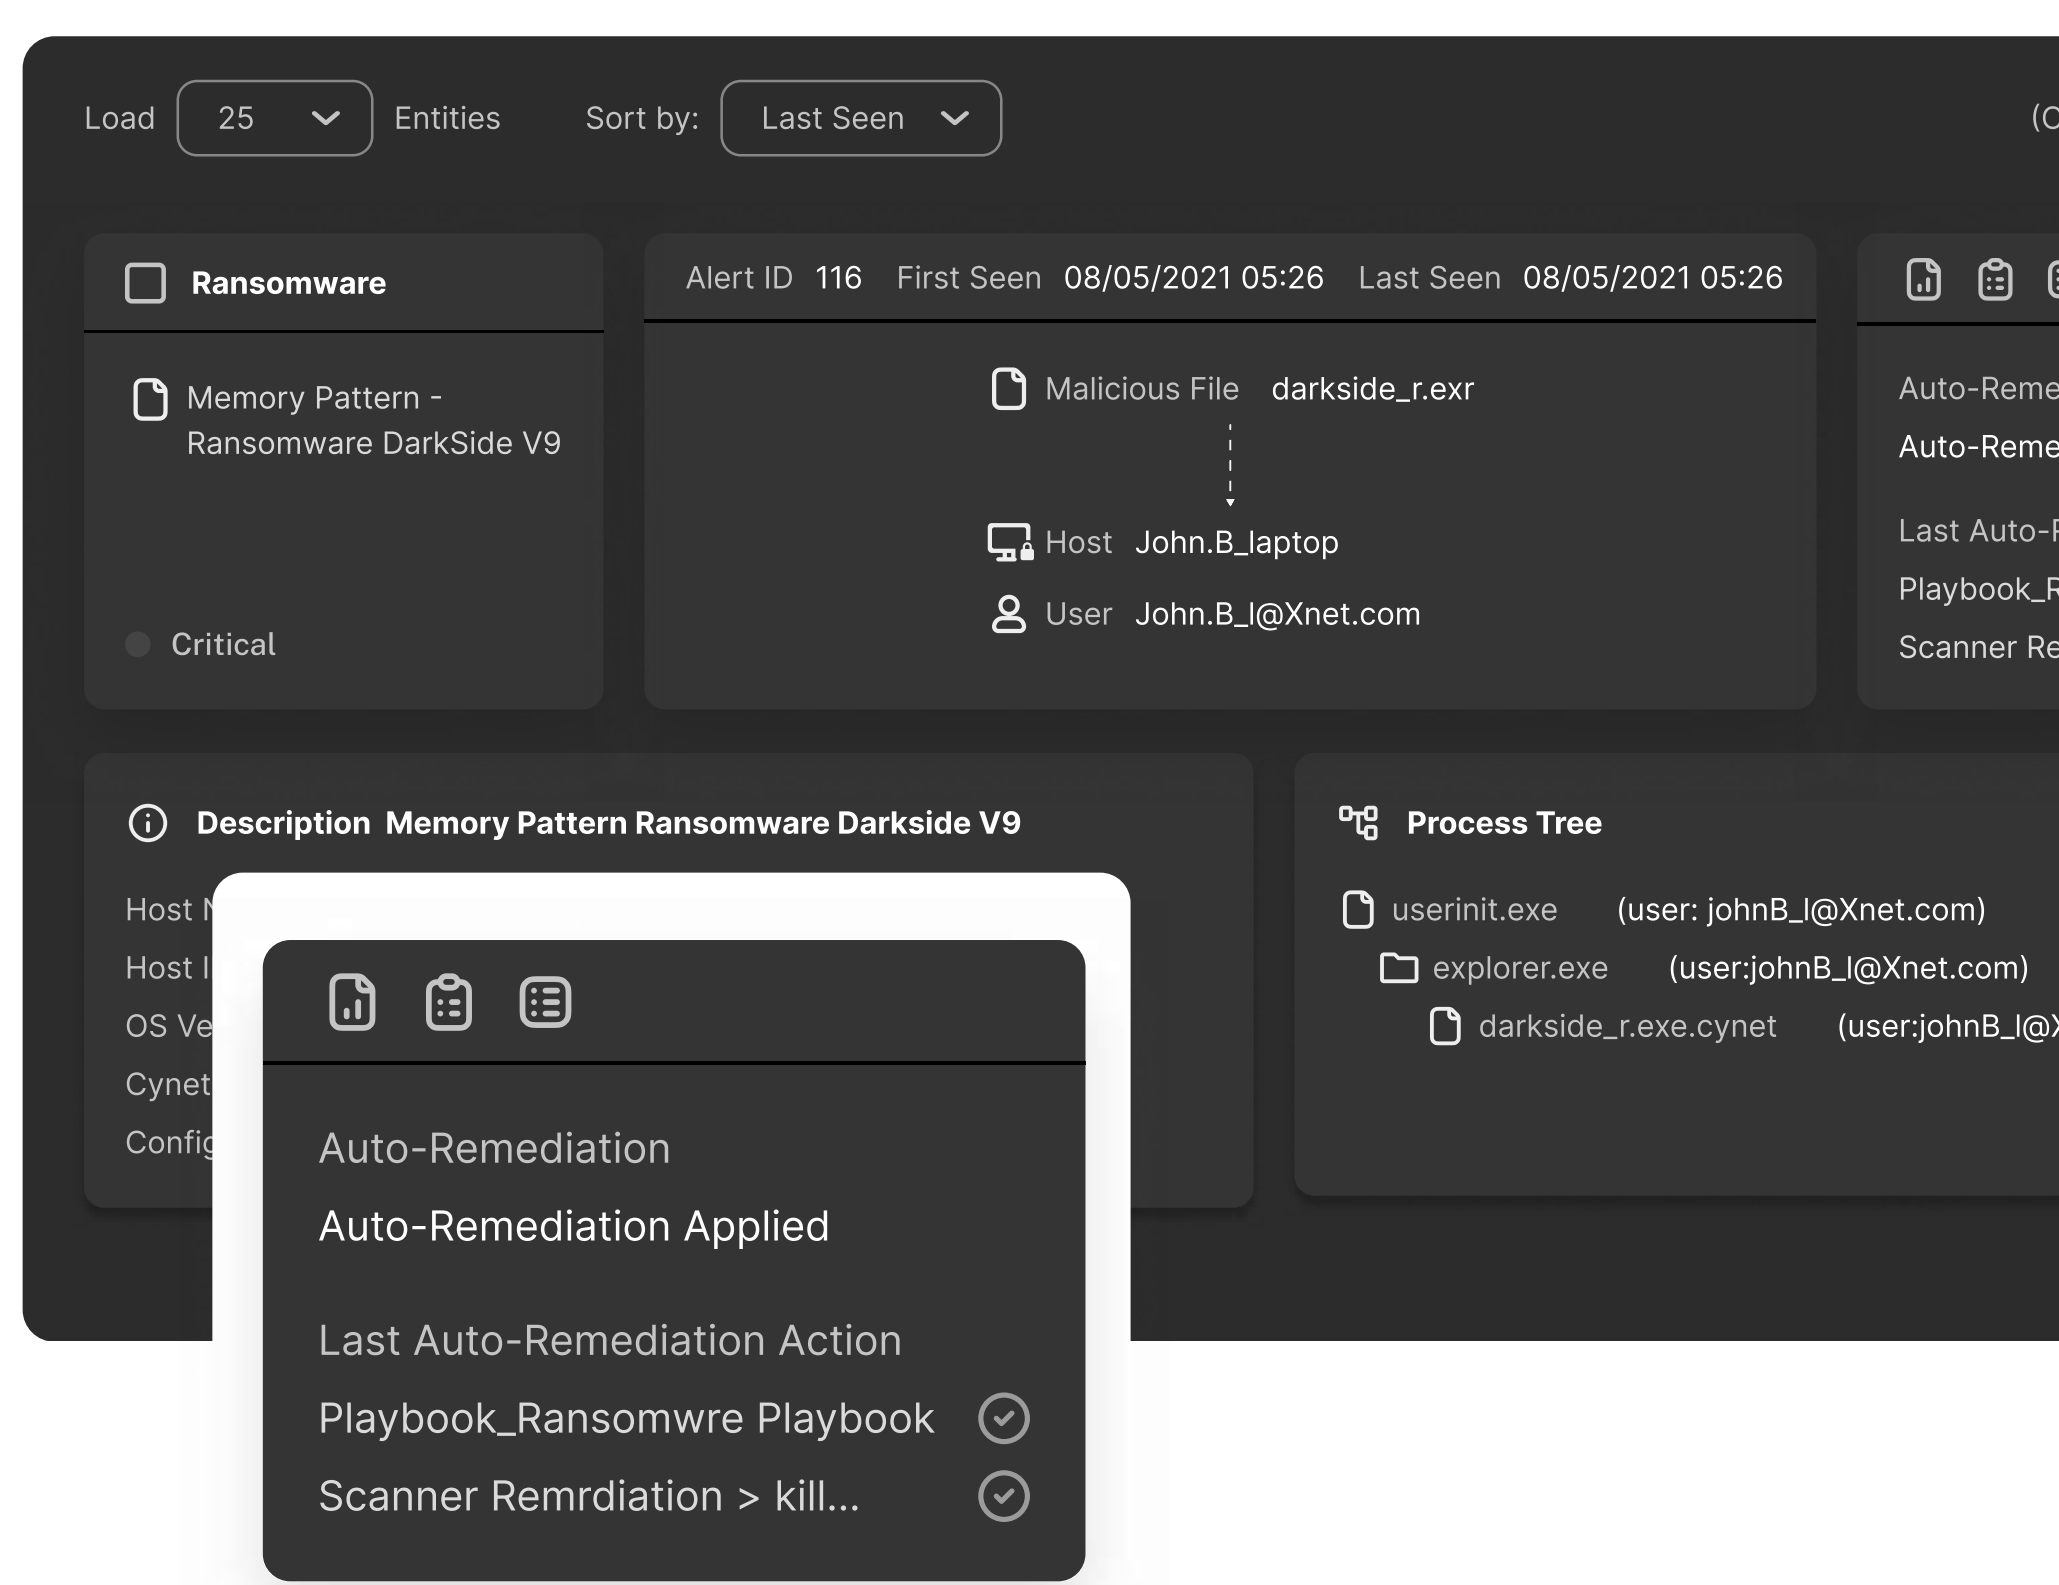

The platform delivers comprehensive and efficient protection for IT security teams with limited resources to provide superior protection within budget.

Cynet natively provides the essential security technologies you need to protect your organization in one automated, simplified platform that delivers enterprise-grade protections with less manual effort and lower cost. And it's backed by a team of security experts 24/7.

The capabilities included in Cynet's platform work together to deliver the best protection possible across your expanding attack surface.

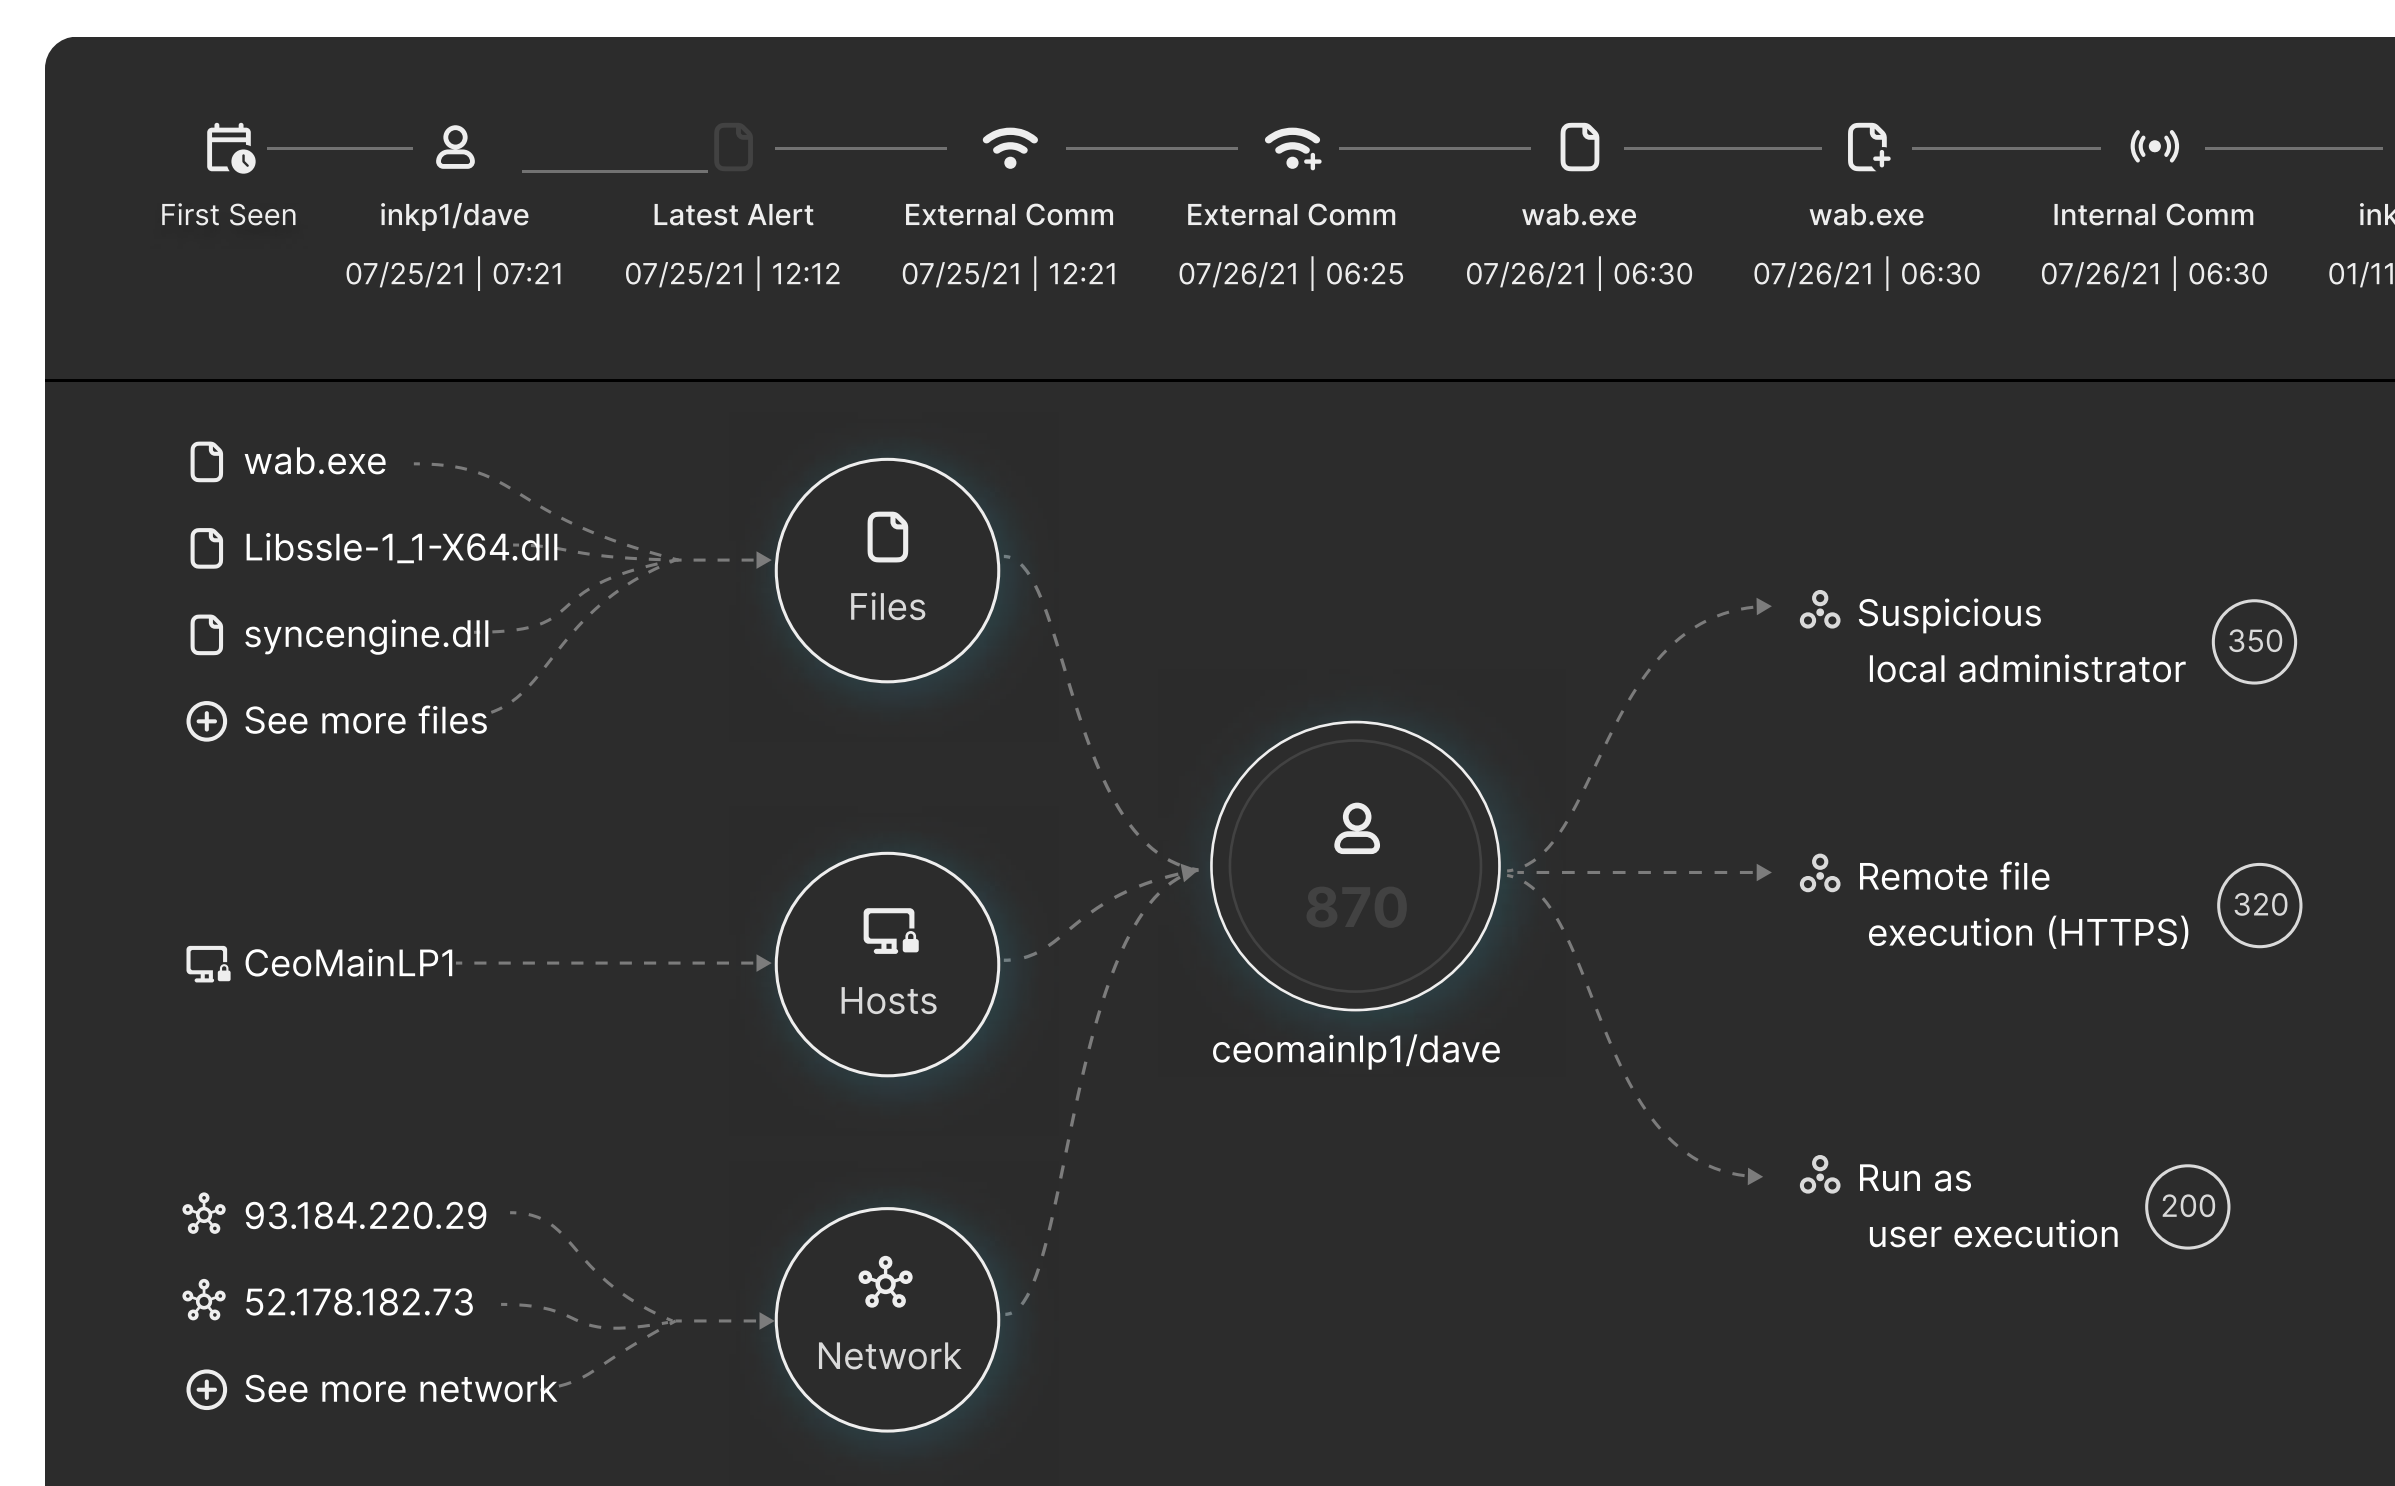

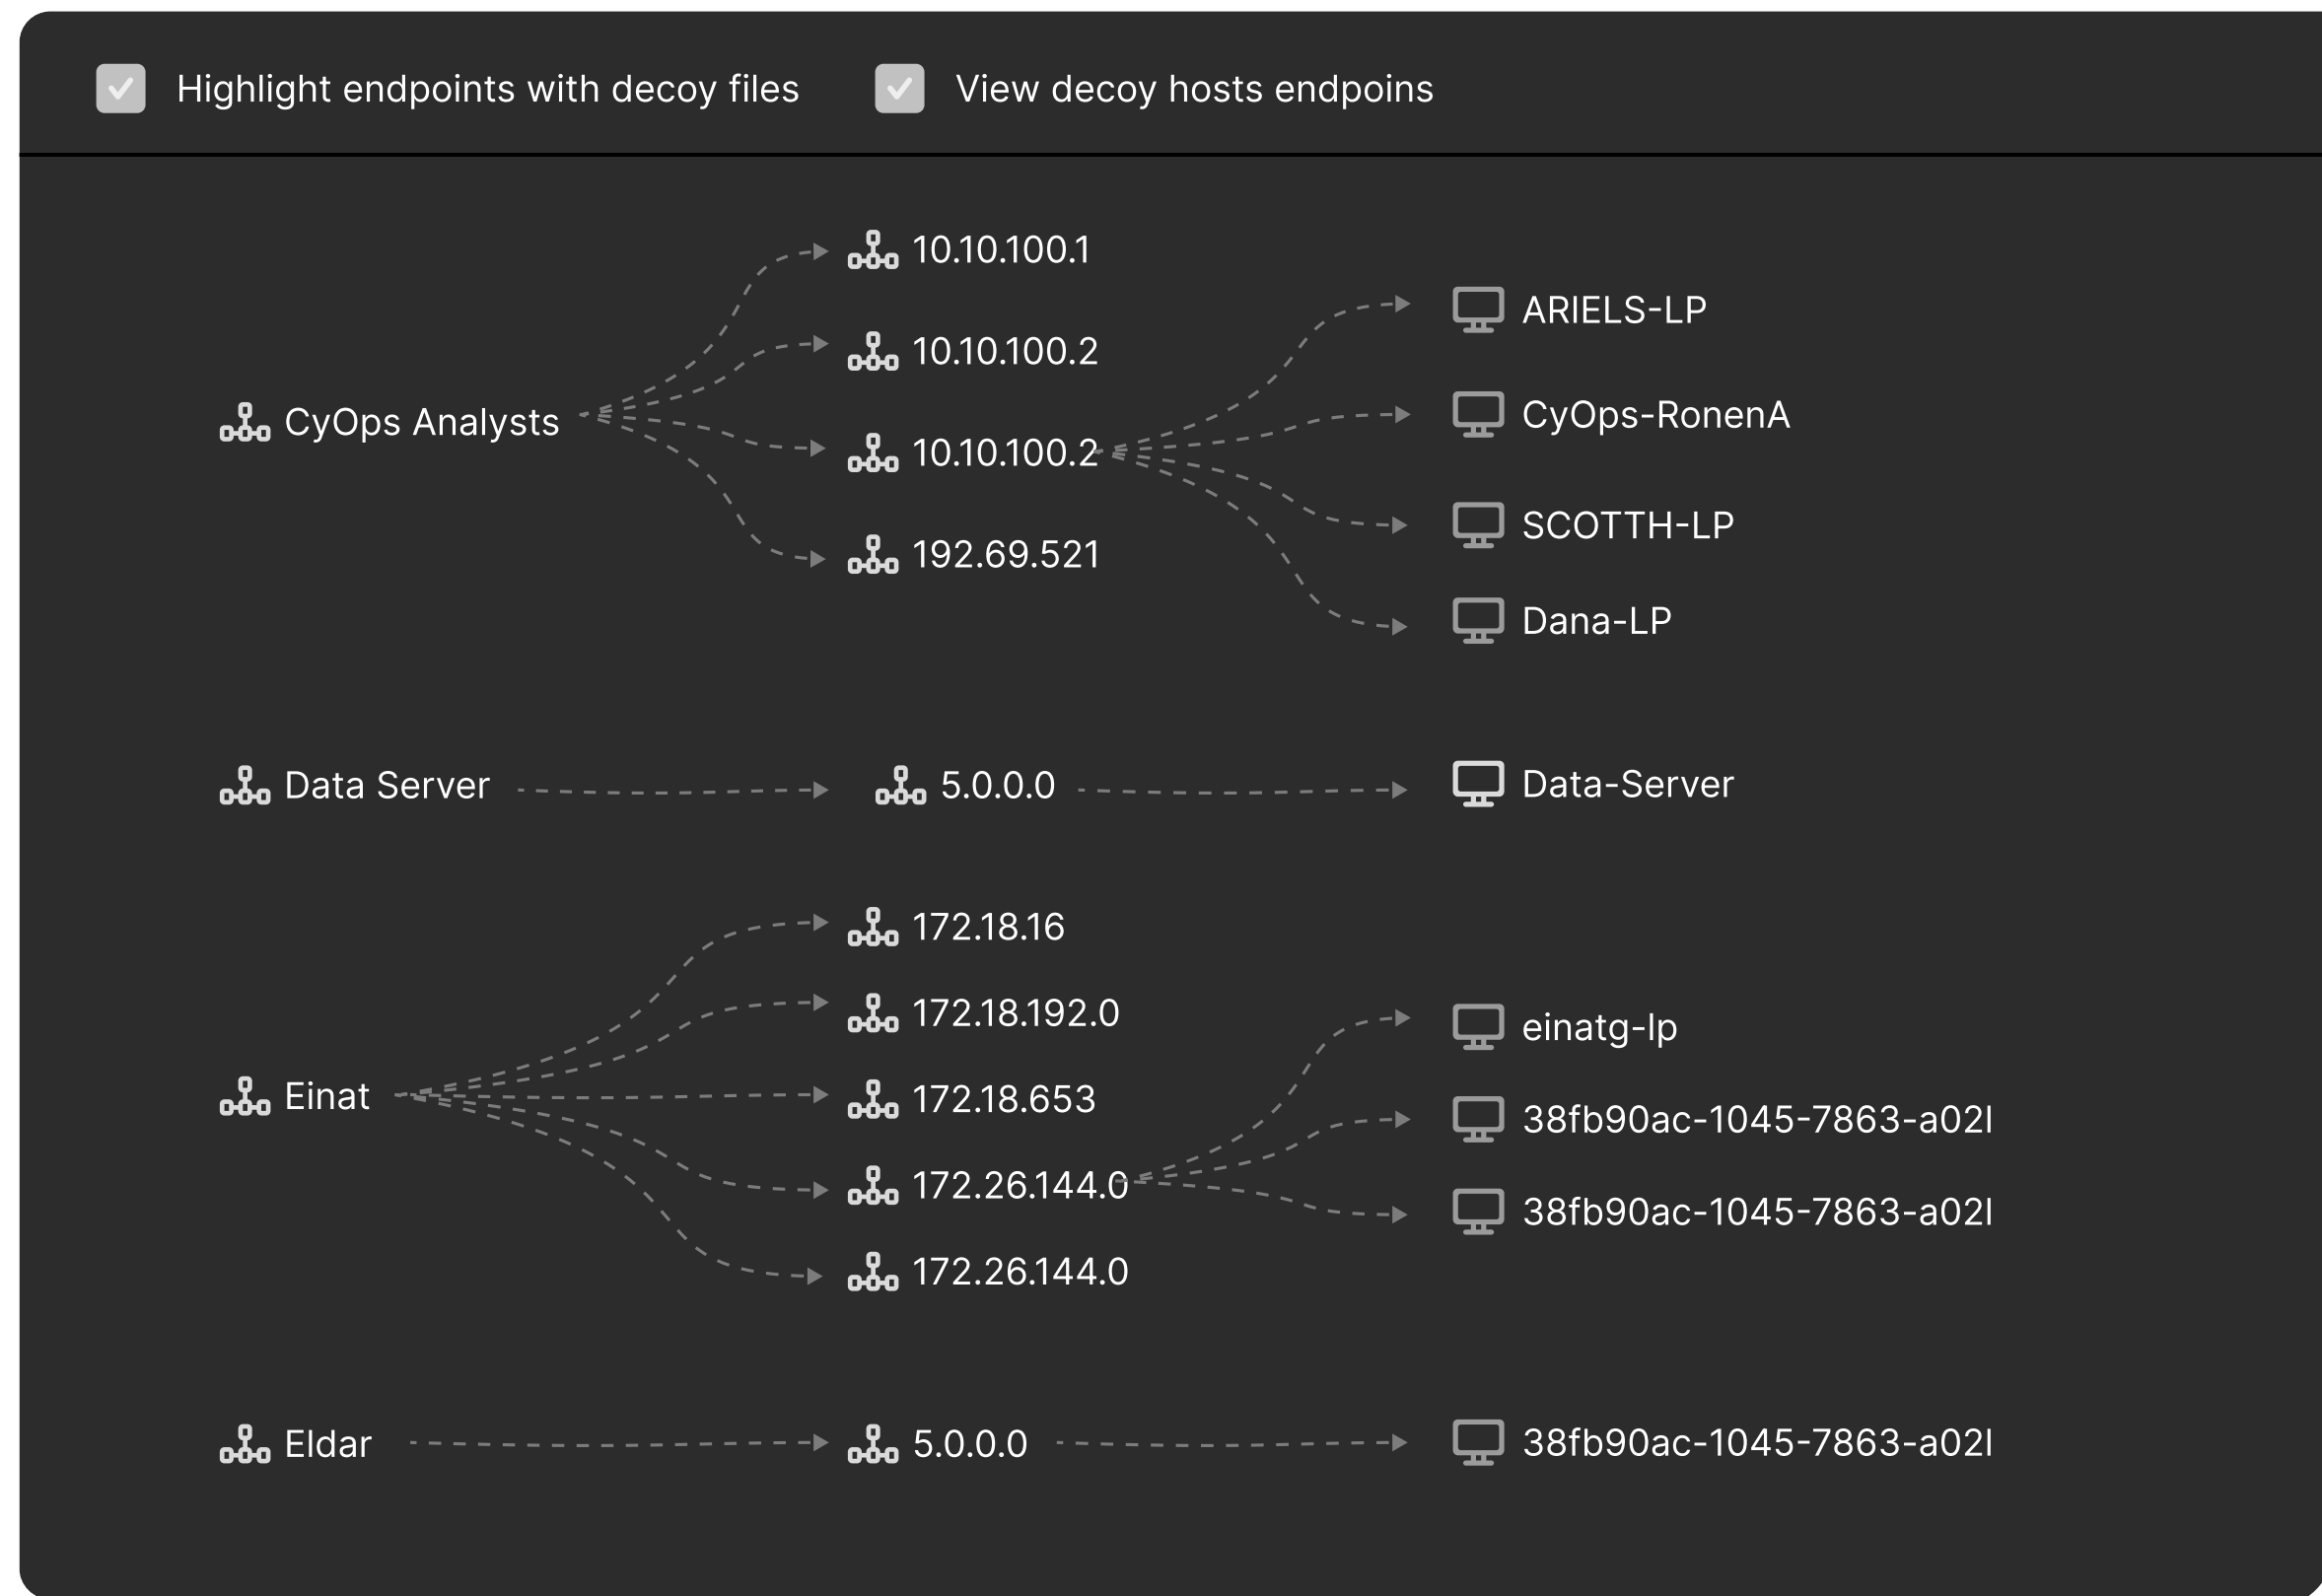

What does Cynet All-in-One natively provide?

Cynet keeps your workstations, servers, and mobile devices safe from malware, ransomware, and other dangerous cyberthreats with proven Endpoint Protection, Device Control, Mobile Protection and endpoint security posture management to detect and fix endpoint vulnerabilities and configuration risks.

We continuously monitor user behavior to detect and block malicious insiders and compromised accounts, with user behavior analytics, Deception and Domain Filtering technologies.

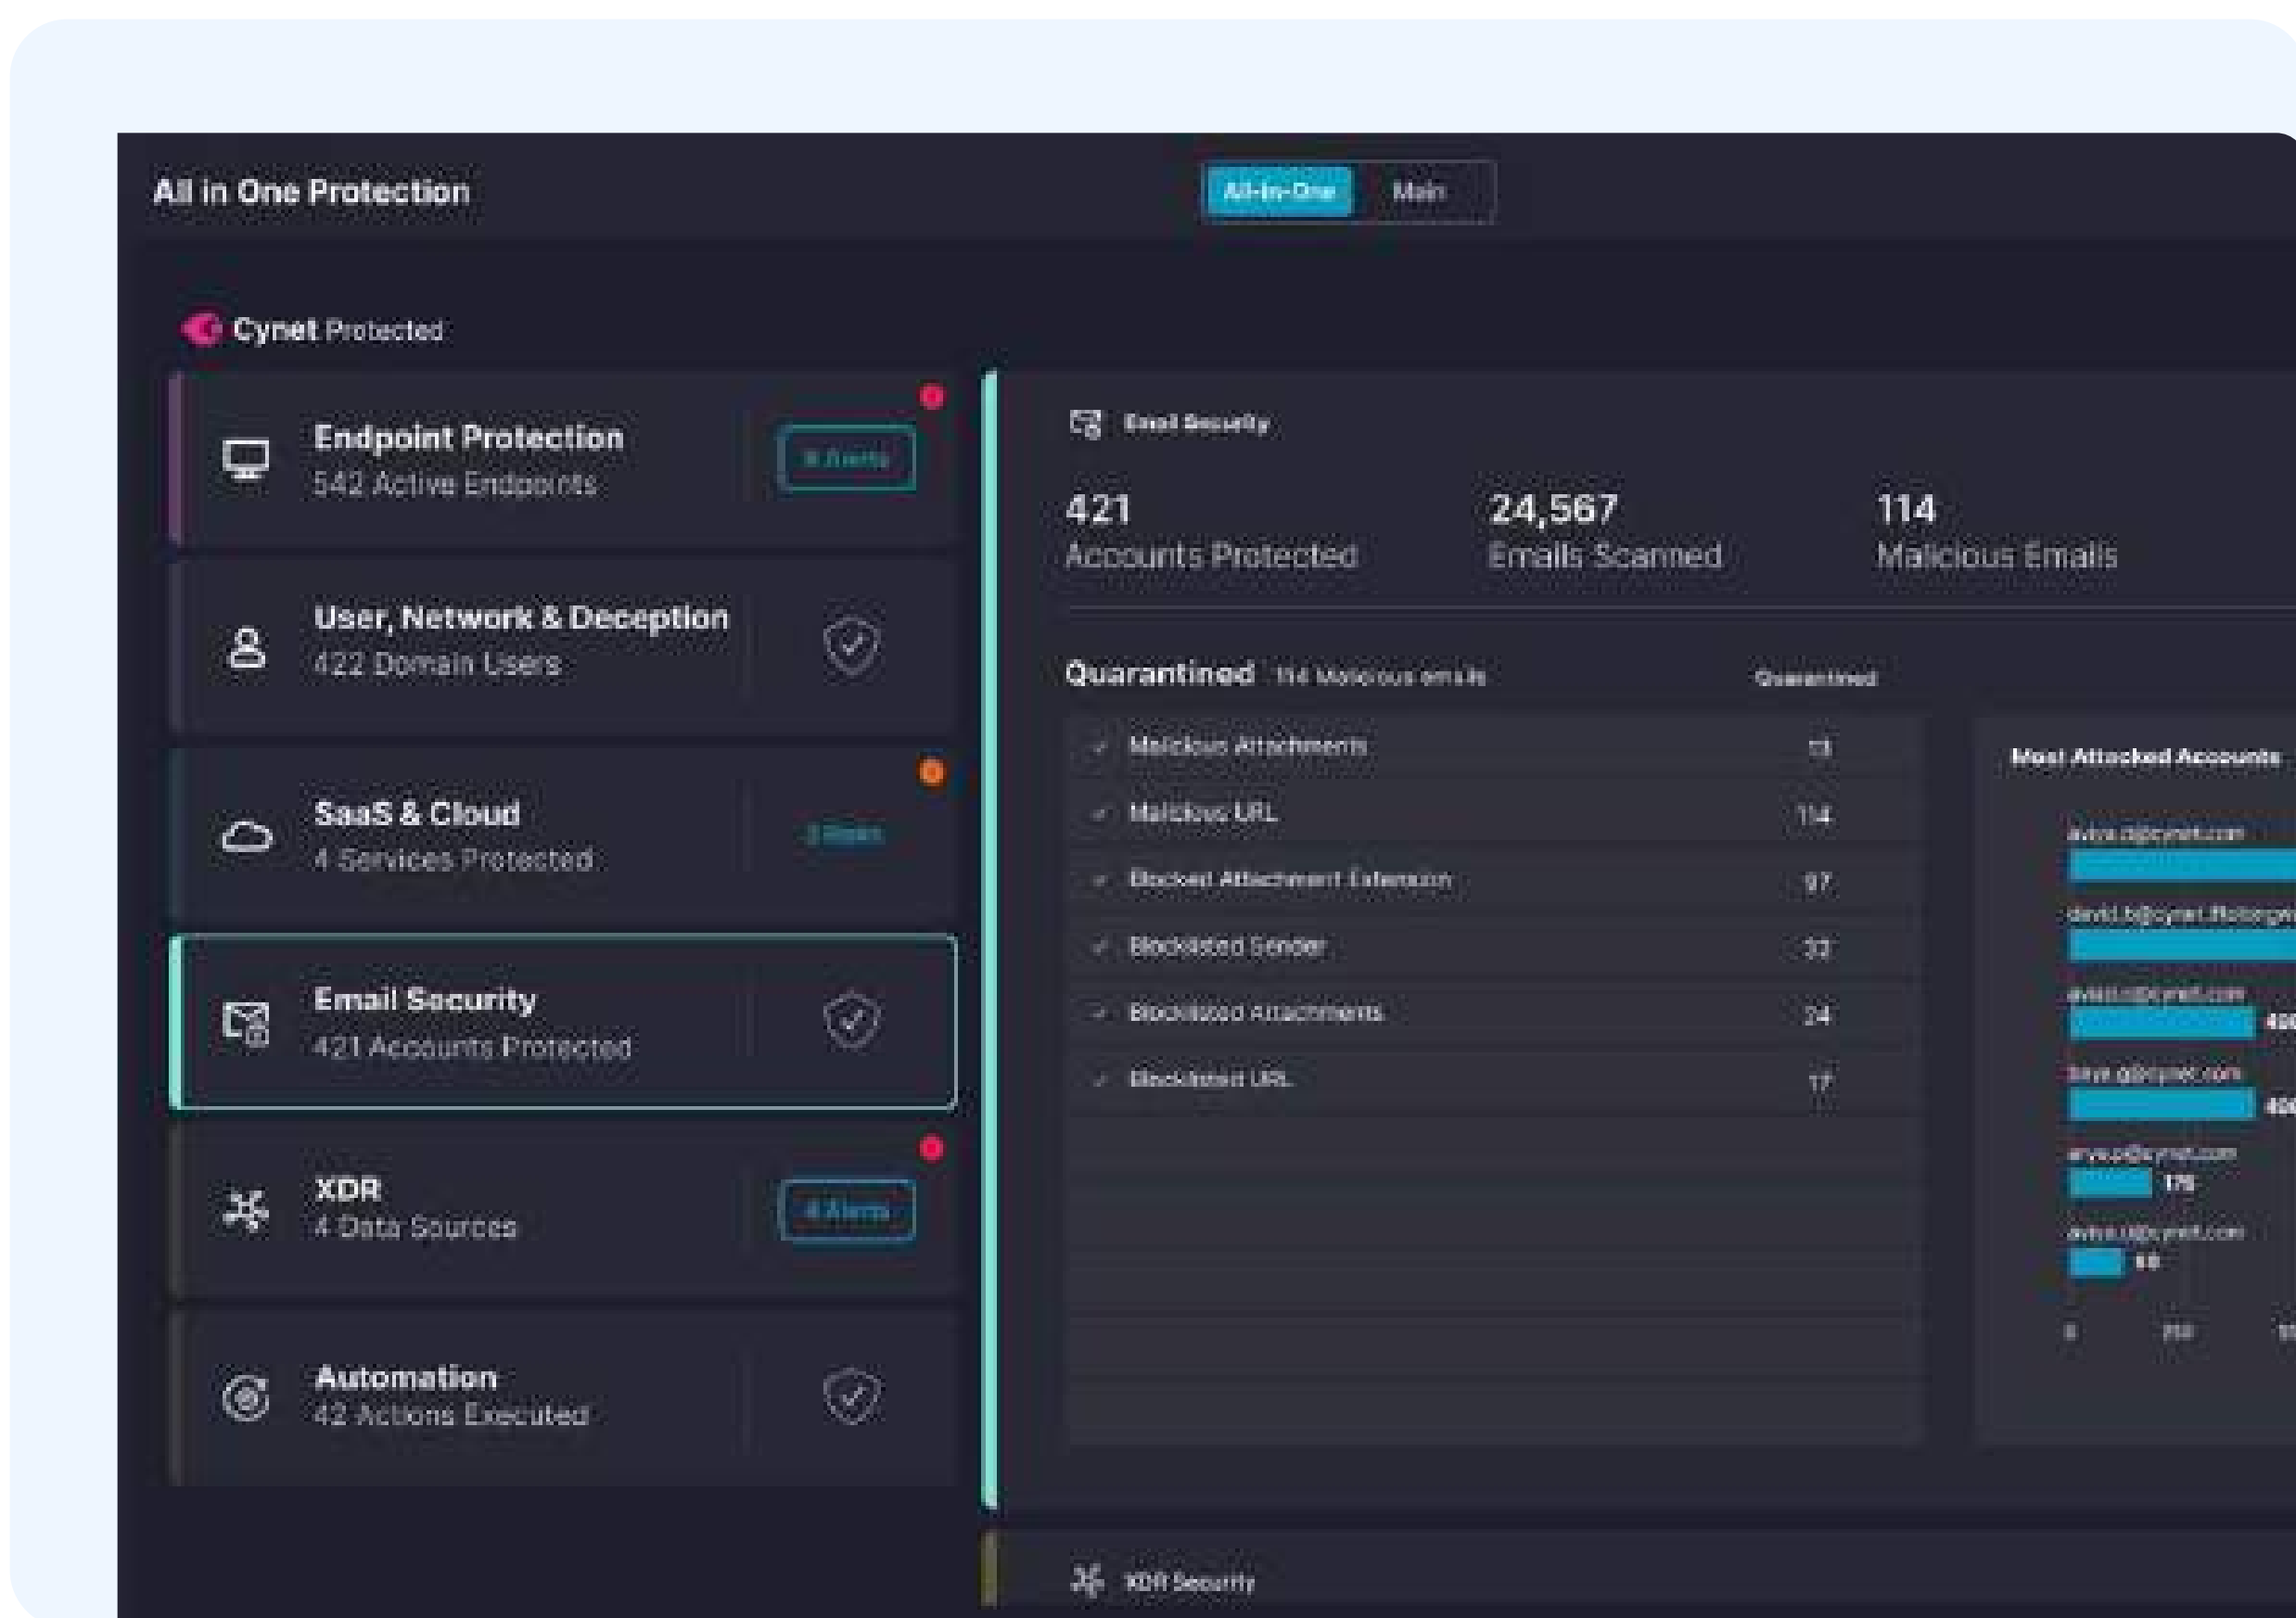

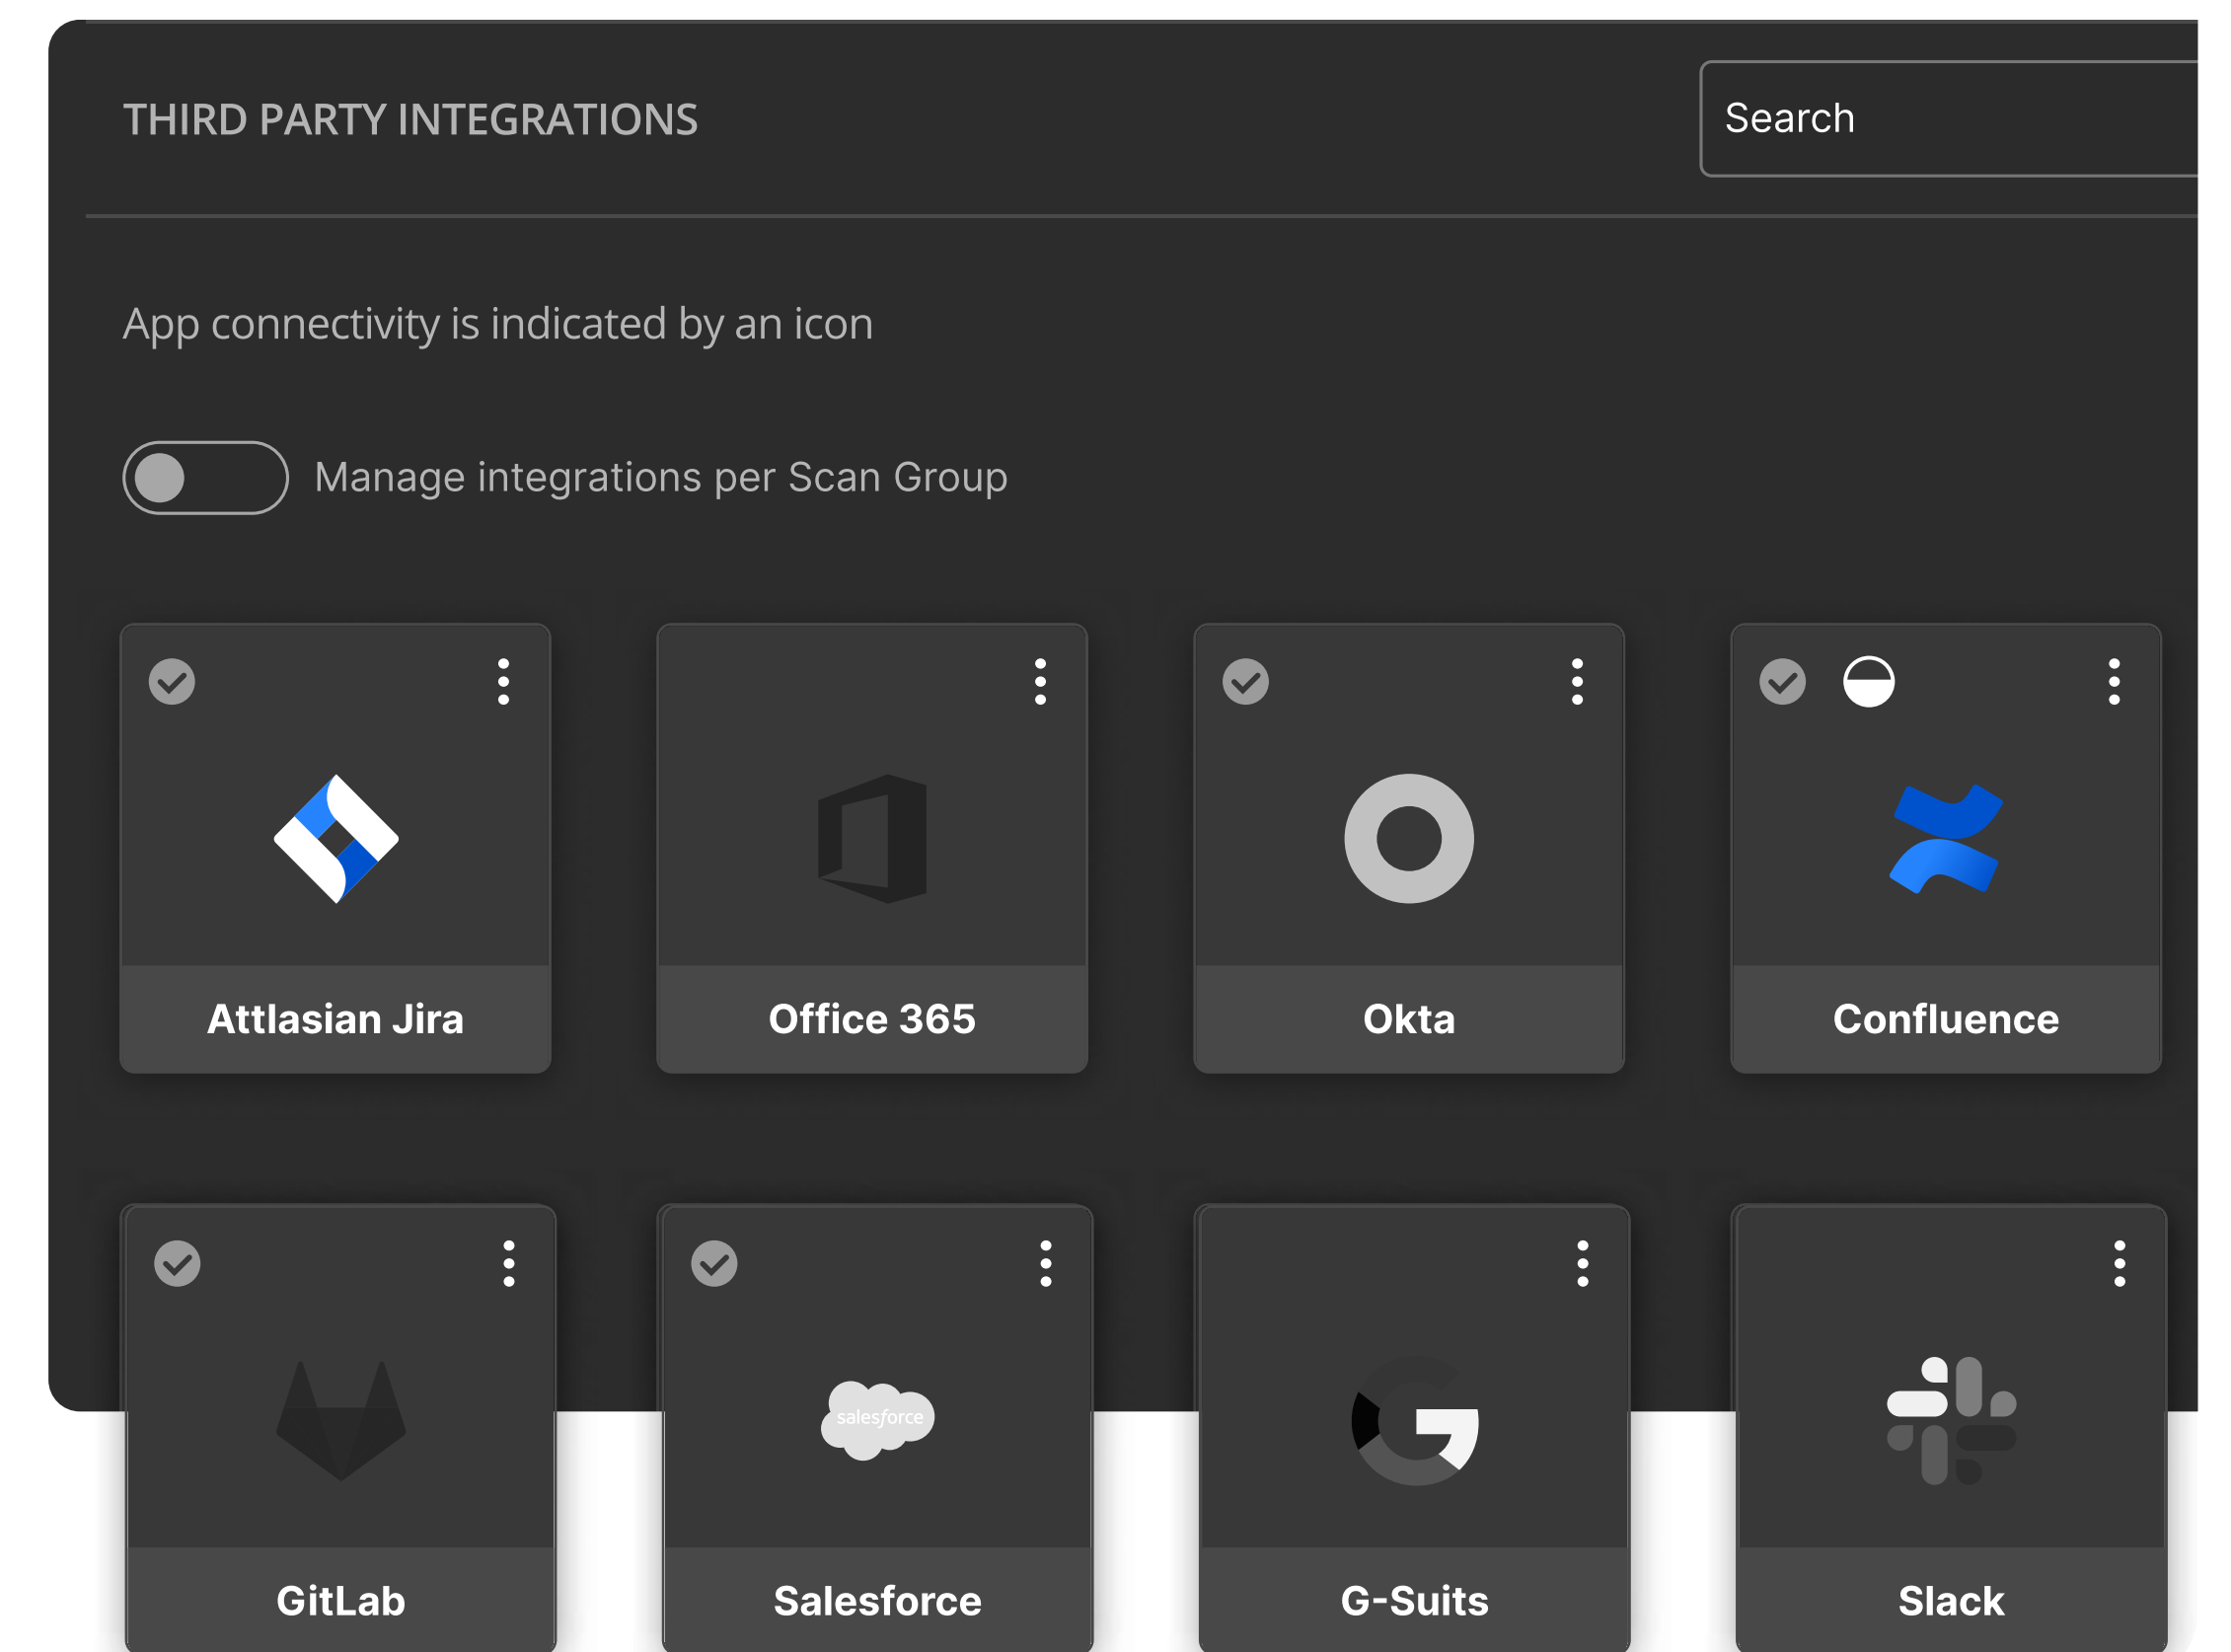

We protect your network

Cynet detects and prevents stealthy attackers from accessing and moving across your network, as well as blocking connections to malicious sites with Network Analytics and Port Scanning.

We protect your SaaS/Cloud apps

Cynet automatically identifies, prioritizes, and fixes security risks across all your SaaS and Cloud applications.

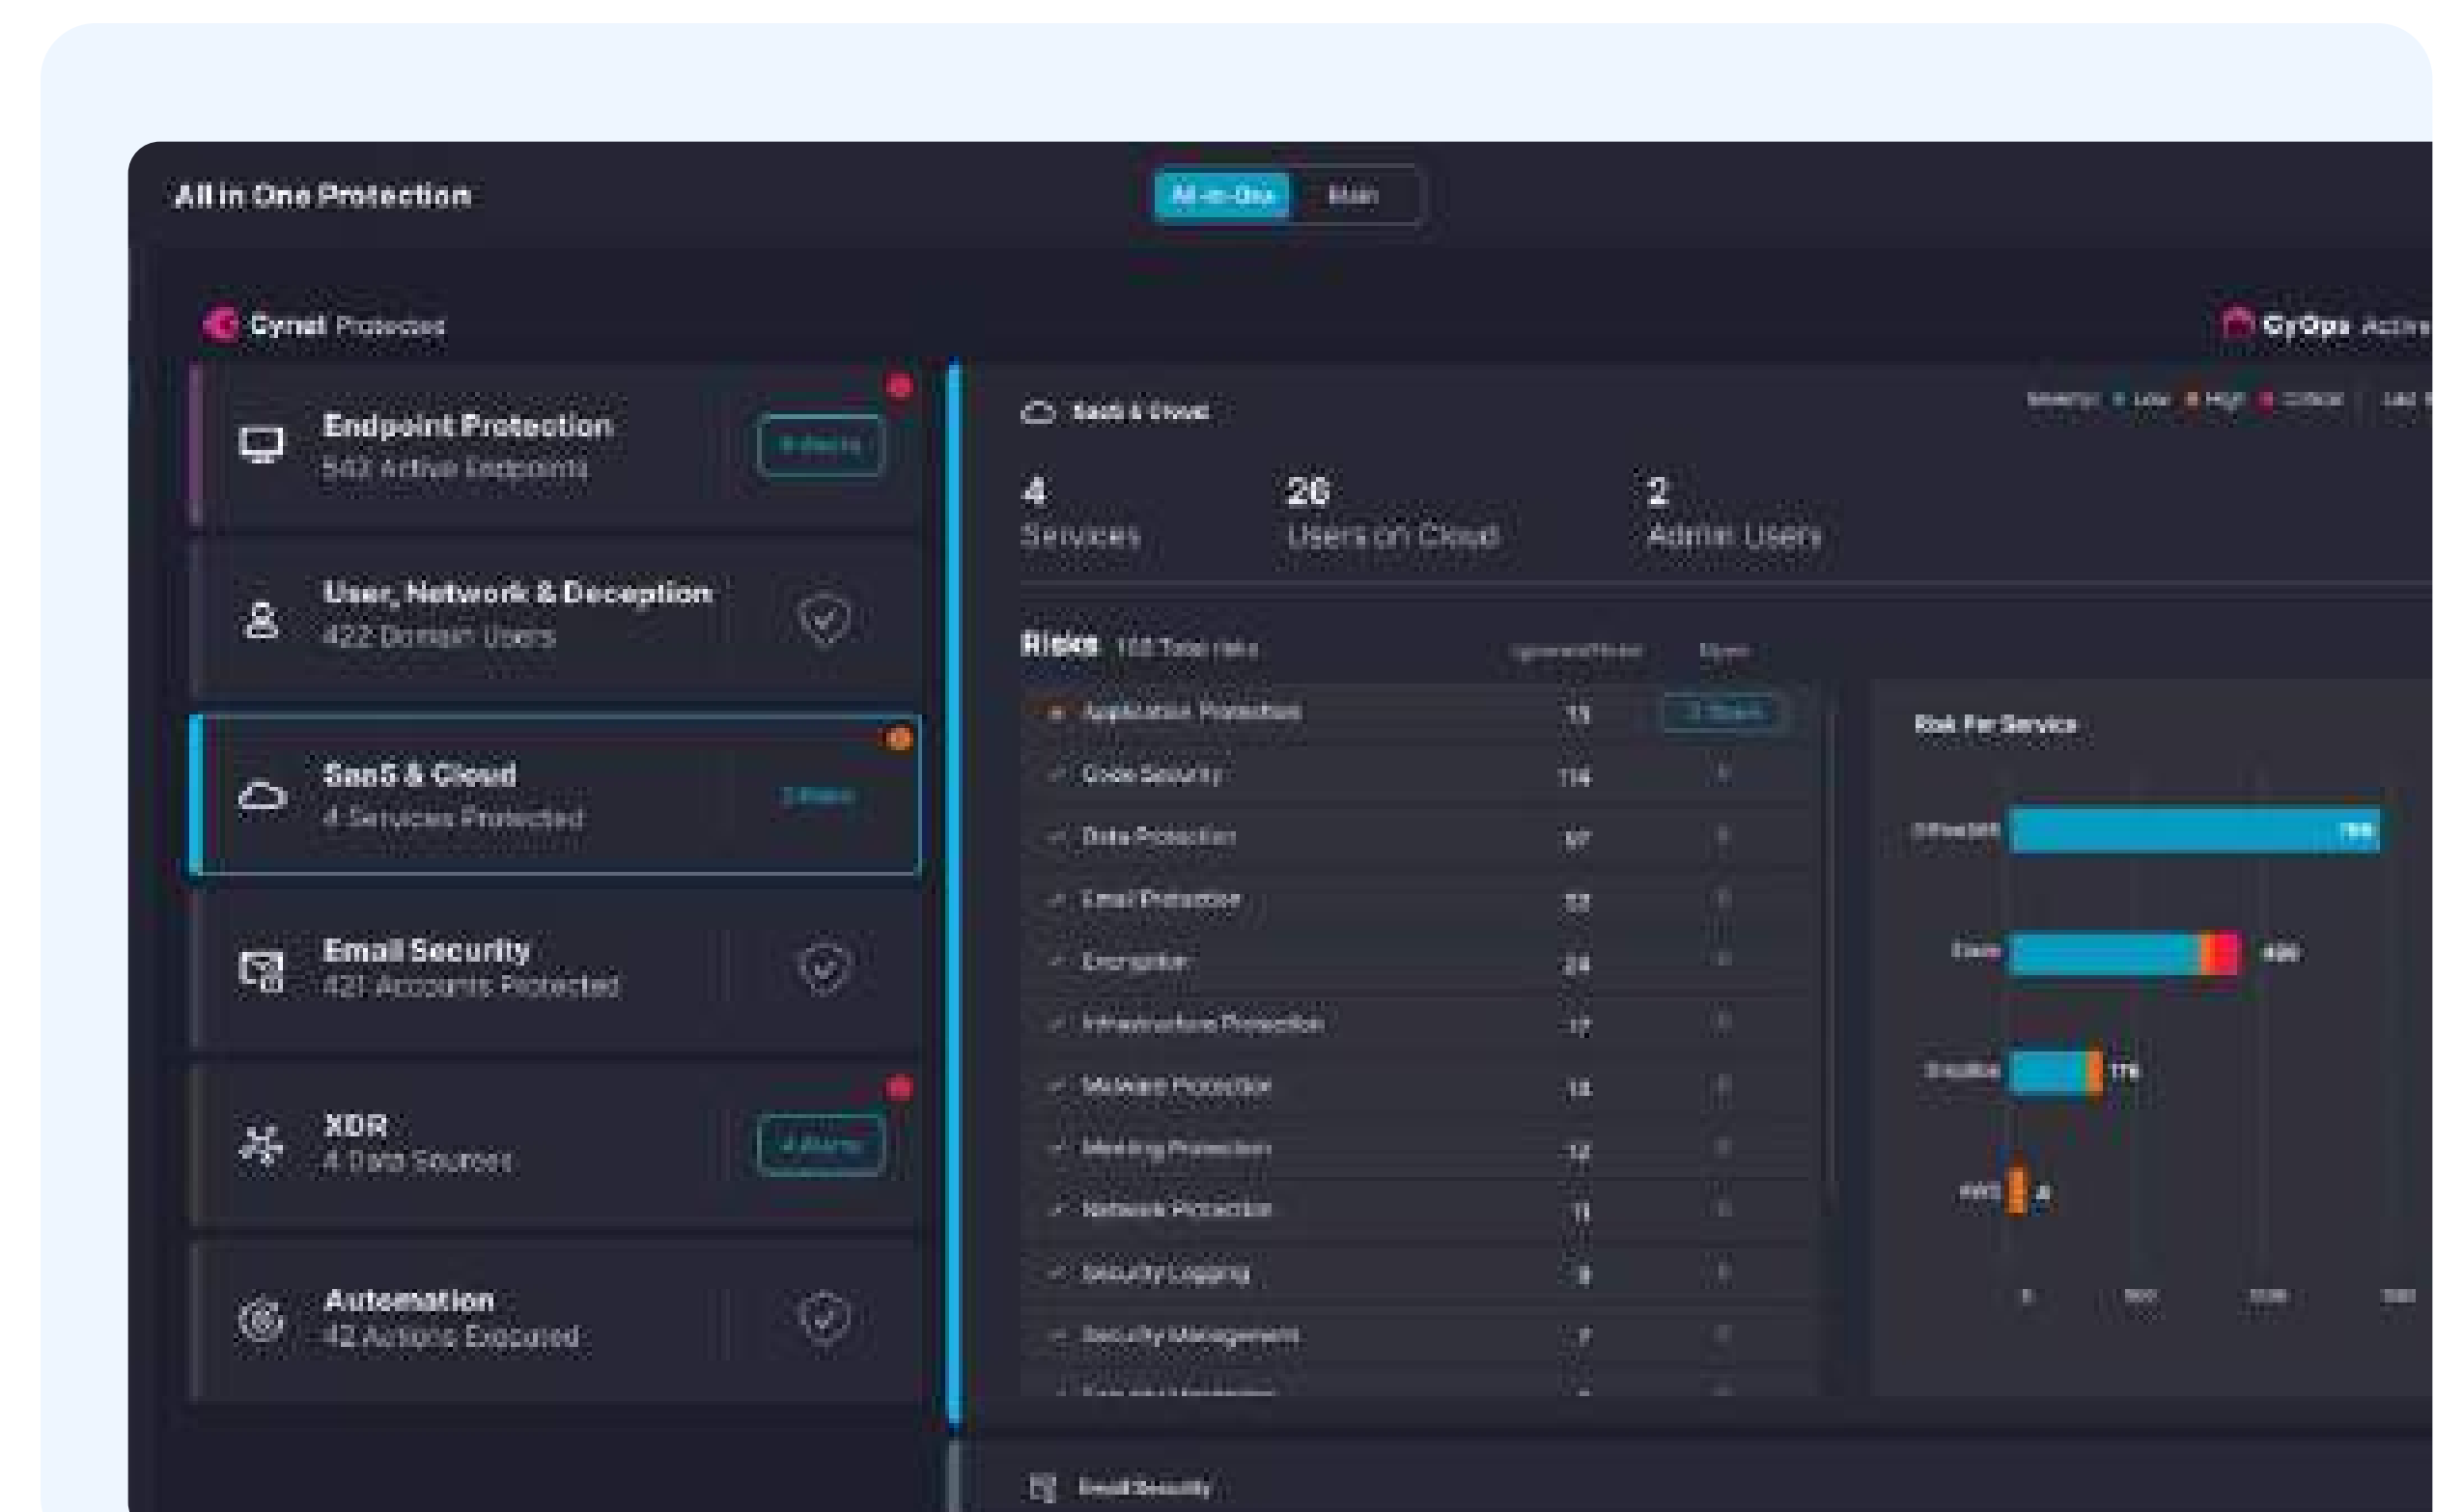

We protect your email

Cynet monitors your email for malicious attachments and links and can block risky senders and domains to minimize the risk of this attack entry point with Email Security.

We protect your third party systems

Cynet can detect and respond threats across third party integrations such as Active Directory, Firewalls and SaaS/Cloud apps.

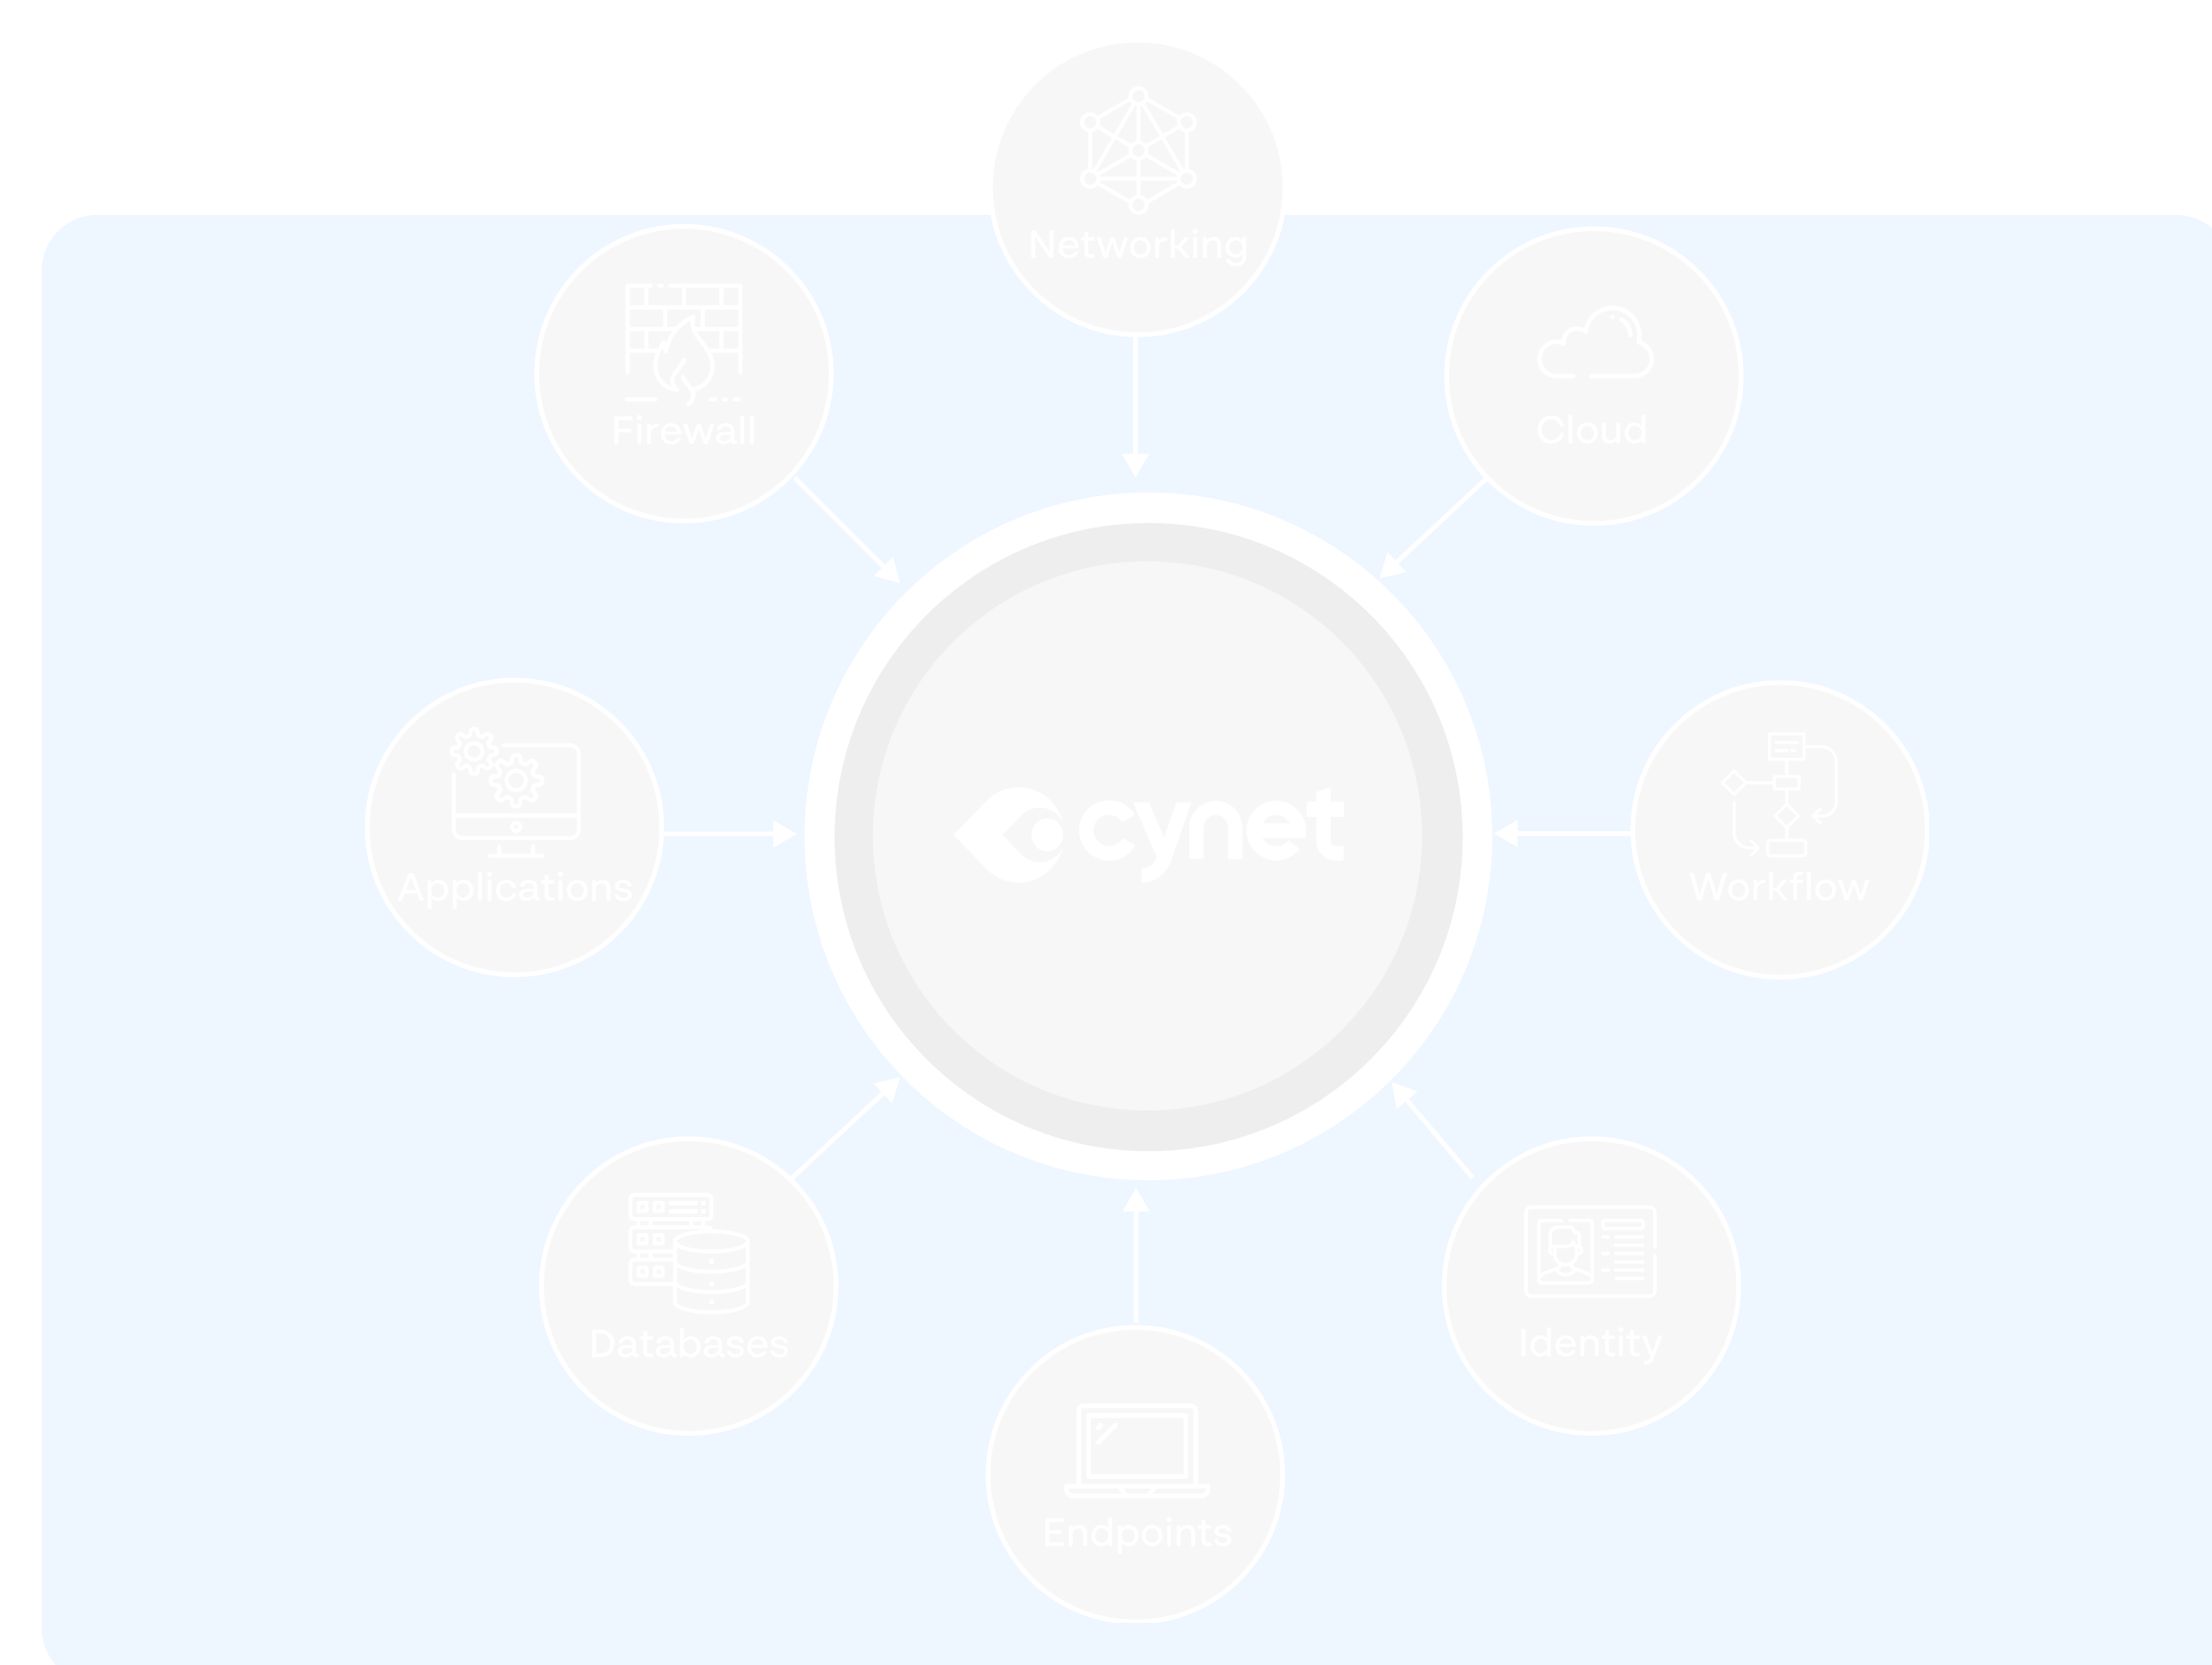

24x7 Security Operations Center

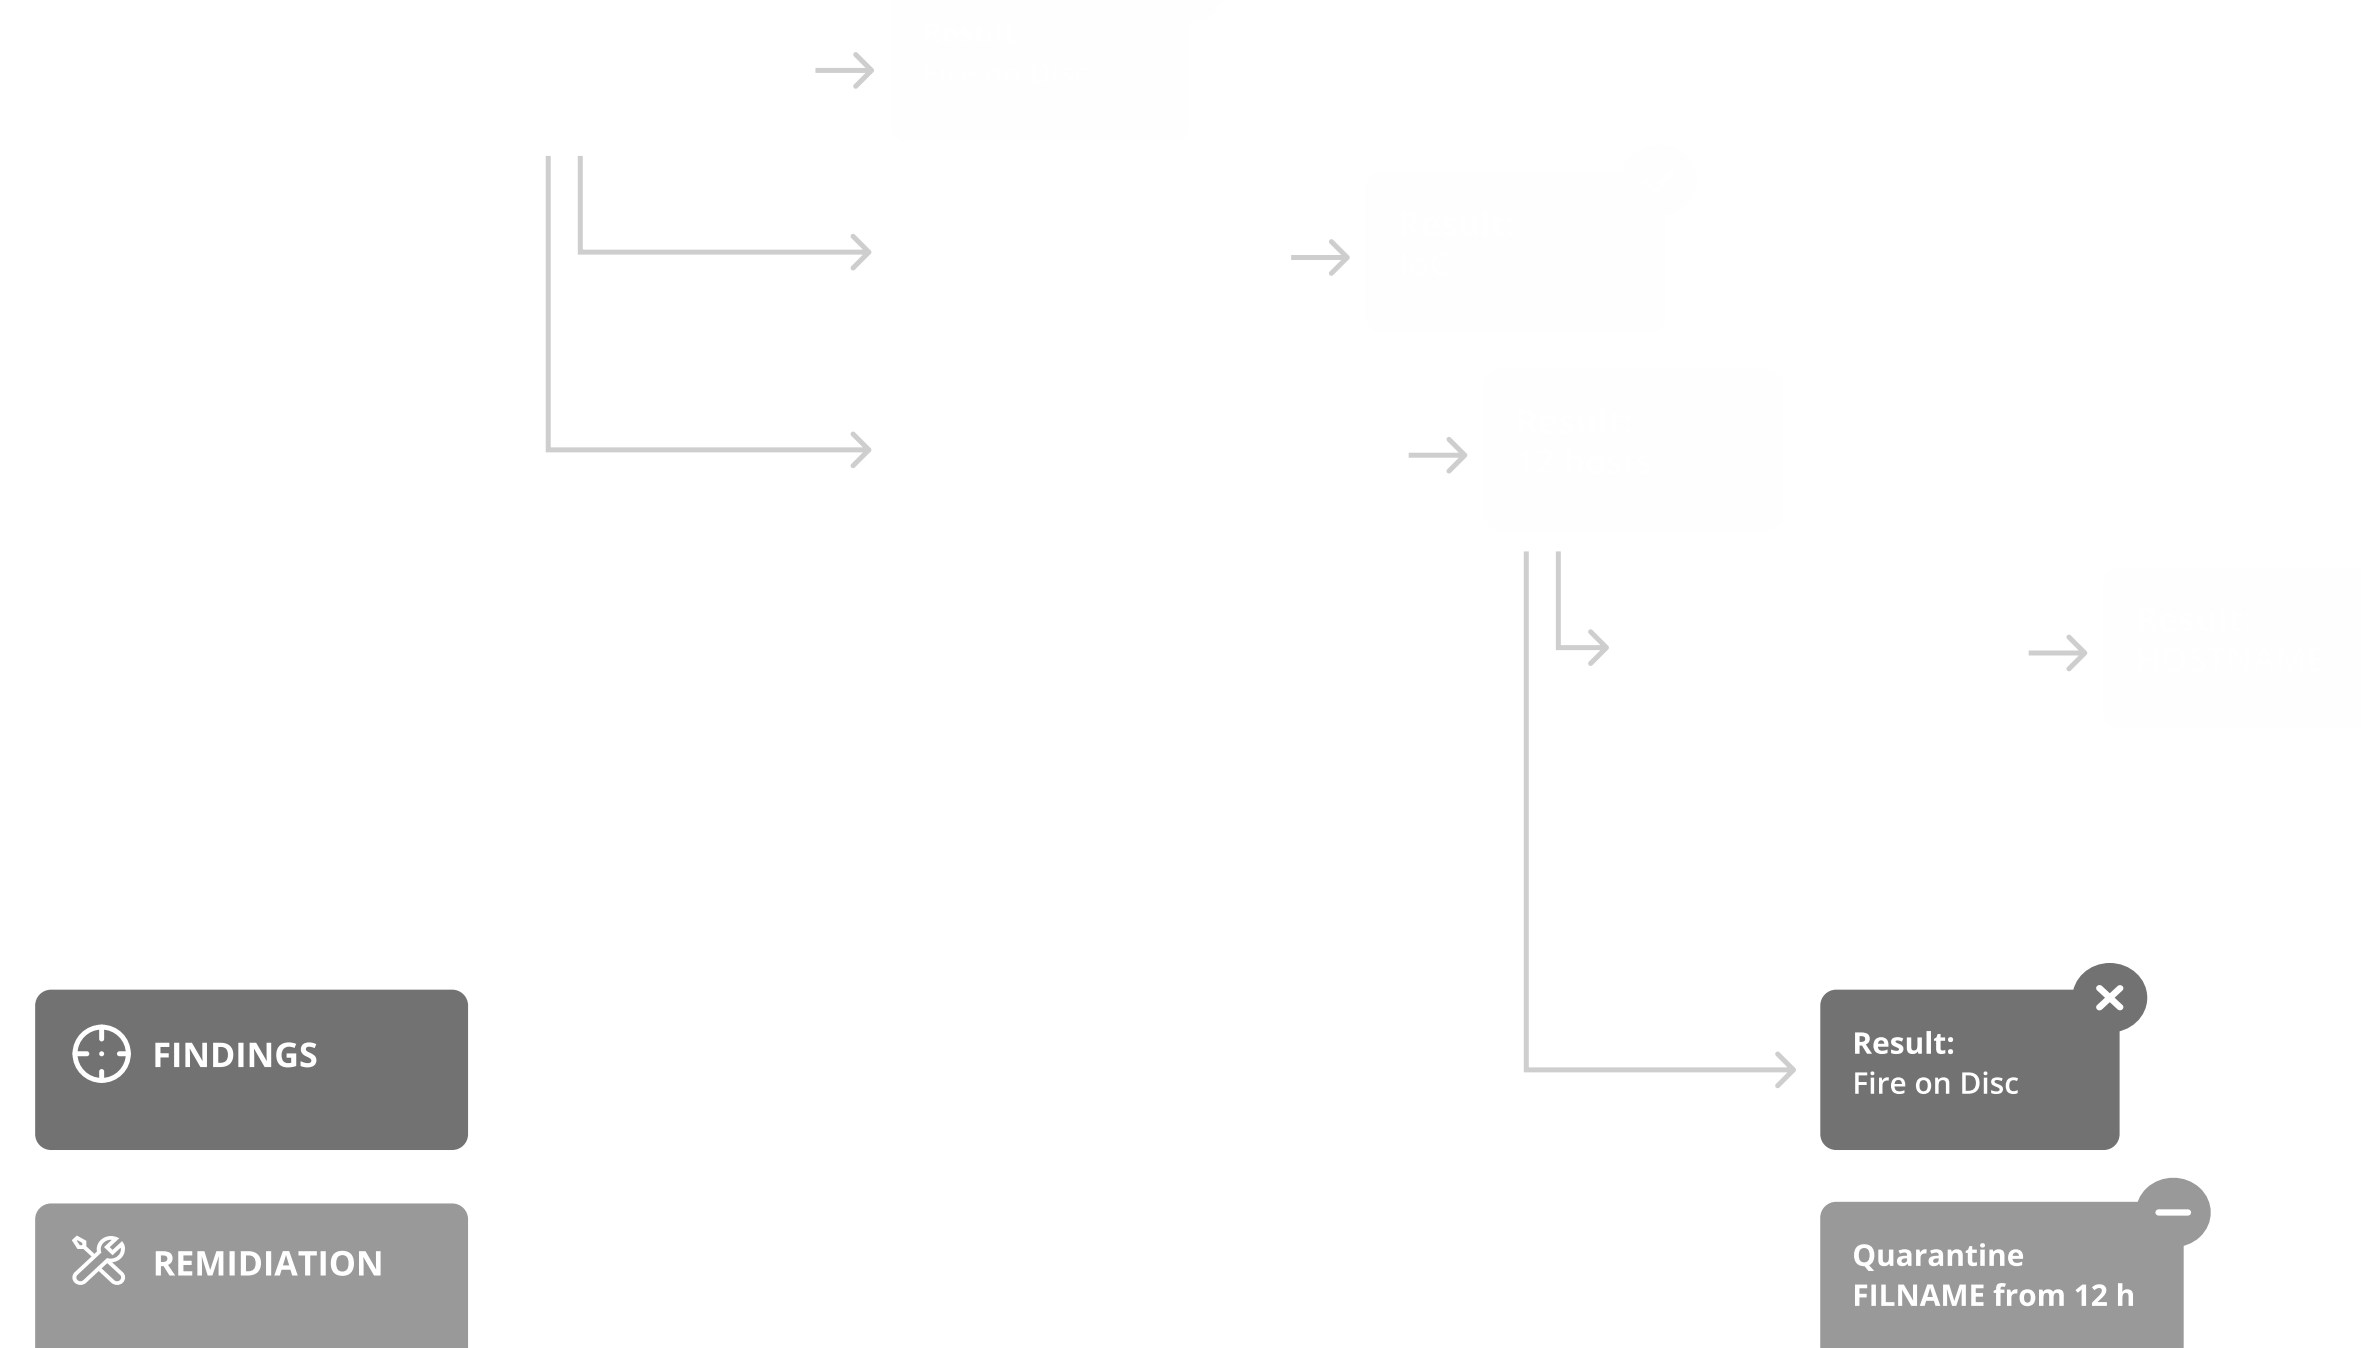

Get a team of world-class cybersecurity experts working around the clock to keep you safe by monitoring your environment and immediately addressing threats.

Log Management and XDR

Collect high priority log data to quickly and accurately uncover threats lurking across your environment.

Autonomous Responder

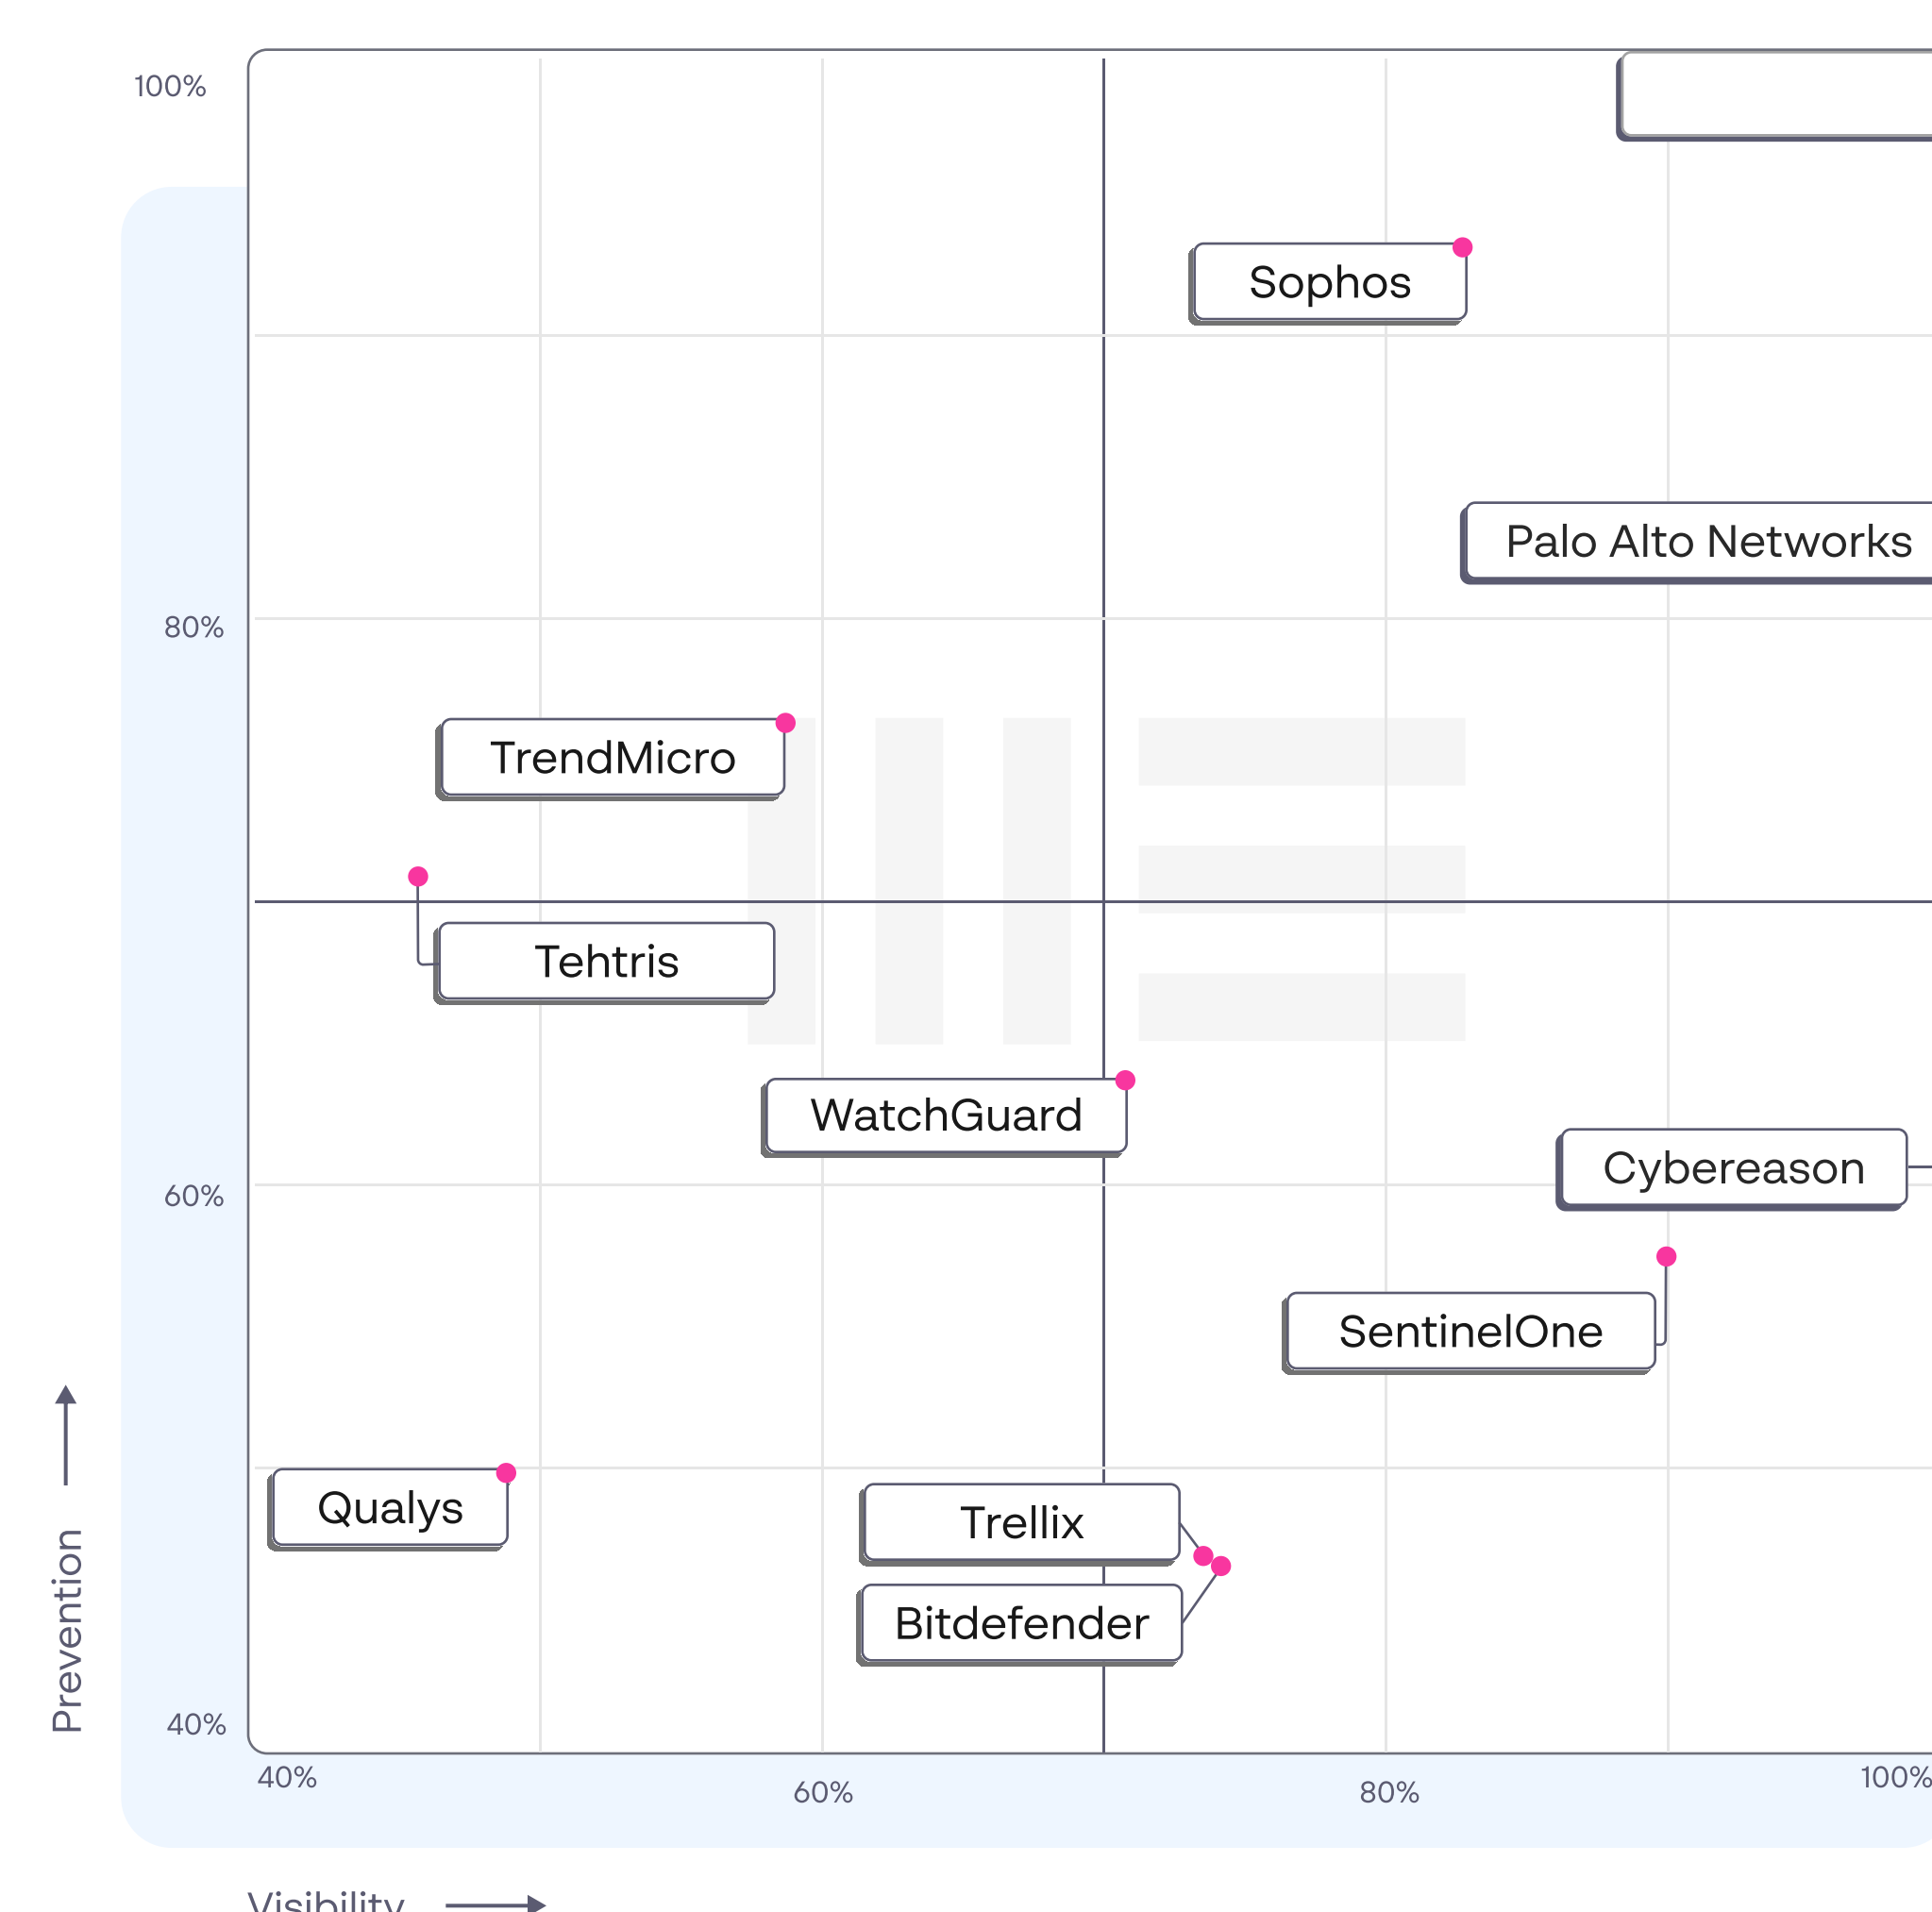

End-to-End Automation

Cynet can automatically investigate and remediate all attack components across your environment using best-practice incident response workflows with advanced response automation technology.

Top MITRE ATT&CK Performance

Cynet's 2024 ATT&CK evaluation results are exceptional by any measure. Using no Configuration Changes, Cynet achieved 100% Detection Visibility, 100% Technique-Level Coverage, 100% Protection and 100% Prevention. Our results demonstrate the unmatched effectiveness of the Cynet All-in-One platform for protecting your organization with an effective, yet highly intuitive, cost-effective solution.

Cynet packages

Cynet All-in-One

Full enterprise-grade security platform with 16 critical protection technologies, including response automation, cloud protection, centralized log management, and 24x7 MDR support.

Cynet All-in-One delivers all the breach protection technologies used by the largest global enterprises in a single, native, unified platform out-of-the-box. Get visibility and protection across endpoints, networks, users, email, mobile, cloud and SaaS apps along with deception technology for an additional layer of protection. All-in-One also includes response automation, centralized log management and a 24x7 MDR service. Cynet All-in-One is the most comprehensive cybersecurity solution available today.

Cynet Elite

Industry-leading XDR platform for robust environment protection backed by 24x7 MDR support.

Cynet Elite protects your environment with the industry-leading protection platform that monitors and synthesizes activities across endpoints, networks, users and decoy beacons to provide unparalleled threat detection and response across your entire environment from a single pane of glass. The accompanying CyOps 24/7 MDR support gives you peace of mind that your environment is always being monitored by a seasoned team of cybersecurity professionals.
